

PEPFAR Mozambique

In recent years, the Government of the United States of America, through the U.S. President's Emergency Plan for AIDS Relief (PEPFAR), and the Government of Mozambique, through the National AIDS Council (CNCS), Ministry of Health (MISAU), and other stakeholders in the National Response to HIV/AIDS, have made great progress toward controlling the epidemic by 2030. Below is data that reflects not only numbers, but the lives of human beings filled with stories of overcoming.

PEPFAR's Contribution to the Epidemic Control in Mozambique

2022

Number of HIV tests performed

9,400,448

Number of people who received a positive HIV test result

329,855

Cumulative number of people living with HIV on antiretroviral treatment

1,861,931

Number of pregnant women who received treatment to prevent mother-to-child transmission of HIV

117,791

% of patients on antiretroviral treatment who received viral load test with suppressed result

93 %

Investment made to date in US dollars

\$ 5,246,270,157

In Mozambique, PEPFAR implementation is coordinated by a U.S. government team consisting of the Department of State, the U.S. Agency for International Development (USAID), the Centers for Disease Control and Prevention (CDC), the Department of Defense, and the Peace Corps.
